

Operations to encode and decode unix domain sockets contained in Parcel

```
def encodeFd(destURI, fd):  
    // Serves and forwards fd to dest URI  
    uri = serve(fd)  
    new Forwarder(destURI, uri, fd)  
        .start()  
    return uri
```

```
def decodeFd(srcURI, uri):  
    // Serves at uri, and forwards to srcURI  
    (fd, receiveFd) = socketpair()  
    new Forwarder(srcURI, uri, receiveFd)  
        .start()  
    serve(fd, uri) /* serve at this uri */  
    return fd
```
